Box Plot - xxx Measures Over Time (Weeks Since Randomized)/Treatment Emergent Change

Box plot type=schematic, the box shows median,interqutile range (IQR, edge of the bar), min and max within 1.5 IQR below 25% and above 75% (ends of the whisker).Values outside the 1.5 IQR below 25% and above 75% are shown as outliers. Means plotted as different symbols by treatments. Red dots indicate out of normal reference range measures. xxxx reference range is used.
N=# of subjects with all baseline measures fulfill (TE high:<ULN, TE low:>LLN) n=# of subjects in the N and with any post-baseline measures fulfill (TE high:>=ULN, TE low:<=LLN) %=n/N*100 ULN=Upper limit normal LLN=Lower limit normal
